

At least the propeller is still in the water...

The Swedes confirm – More salmon in the Baltic

The Swedish Board of Fisheries have recently published another survey confirming that there are much more young salmon in the Baltic now than ten years ago.

It is estimated that in 2010 the population will reach 2.7 mill. young salmon. Five times the number of 1997.

There are several factors causing this growth – but especially cuts in industrial fishing are mentioned as a cause.

Read more about the survey here:

www.fiskeriverket.se

Rules for 2009

As in previous years, this year too we will publish the rules of the contest well before registration opens since we think it is only

fair that participants get a chance to find out what they sign up for without the stress of having to hasten registration.

That is why the jury committee will get together soon.

If there is something you would like us to consider, please do not hesitate to write to:

trolling@tv2bornholm.dk

Then we will bring it up during our meeting.

As you know, we have already discussed the possibility of introducing geographical restrictions for fishing, e.g. in the form of a 20-nautical mile limit, but we have decided against it. It simply will not be possible for us to enforce such a rule.

Once the rules are ready, they will appear in this newsletter and be placed on our website.

Registration for 2009

Registration for Trolling Master Bornholm will open on Monday December 8 at 8:00 a.m.

As in all previous years this can only be done through our website.

For the third consecutive year, the price of participation will remain unchanged. This means that the price will be 750 DKK for one boat including skipper and 150 DKK for each succeeding crew member.

Current State of Fishing

Trolling is not up and running yet. October has been very windy, which is an important factor contributing to the lack of catch reports, because it means there have only been few boats on the water.

This is felt here on Bornholm as well as in Simrishamn. There have, however been reports of a few modest-sized salmon being caught.

The Bornholm Trolling Club's trip to Christiansø was initially postponed, and when it was finally carried through the seas were too high for fishing. Consequently, this trip did not give rise to reports of catches either.

Food and Drink

As previous participants know, local associations offer food in the evening when you get back from the sea. This year, we decided to try and include a brunch in the morning of the first day, which we found to be a great success.

We will also be getting together with the local associations in the near future, and you are more than welcome to come up with suggestions for the menu. We will then discuss them with those responsible, who just like us are very interested in achieving the best result possible.

Newsletter

If you know anyone who should receive this newsletter, please ask them to send an e-mail to: trolling@tv2bornholm.dk

If you do not wish to receive the newsletter, you can sign off by e-mailing to the same address.

Best regards,

Jan Jørgensen,
TV 2/Bornholm
